NOTICE OF ACTION

Inland Wetlands & Watercourses Agency

The Windham Inland Wetlands Commission **met on April 14, 2016** at the Windham Town Hall, 979 Main St. Willimantic CT, at 7 PM and **took the following action:**

Mitchell Shaney - 410-412 North Windham Road - application for wetland permit to remove sediment and invasive plants from existing man-made pond. After hearing from neighbors, discussion and clarification, Commissioner Joseph Wagner MOVED to grant the permit on the condition that the work be done during the dry season, and that the owner use silt fence or hay bales to control sediment from going downstream. Commissioner Helmut Traichel SECONDED the MOTION, and it PASSED unanimously.

Steven Edelman aka Gilead Enterprises LLC for property at 40 Old Brooklyn Turnpike and 96 Back Road, Windham Center CT - request for a renewal of a wetland permit for earth excavations in an upland of a wetland. No activity is proposed within the wetland, but some of the earthen material to be removed is within the 100 foot regulated upland of a wetland. After some discussion and clarification Commissioner Kit Eves MOVED to approve the application; Commissioner Joseph Marsalisi SECONDED the MOTION, and it PASSED unanimously.

Norman and Mary A Marchand of 111 North Windham Road, Windham Center - application for jurisdictional ruling to convey a portion of land to the abutting neighbors that will be combined with their existing property on Bricktop Lane for conservation purposes – not for building lots. Commissioner Kit Eves MOVED to authorize the agent to grant the jurisdictional ruling for the permit. Commissioner Joseph Marsalisi SECONDED the MOTION, and it was PASSED unanimously.

Miscellaneous - Agent James Finger reported that he approved an application from **John R. Brown Home Builder, LLC for property at 112 Jerusalem Road, Windham Center** as there was no activity in the regulated area.
Mr. Finger also reported that he attended a public informational meeting to hear about plans to remove trees at the Windham Airport. The majority of the tree clearing will be at the Willimantic Reservoir on the easterly and northerly sides near the two runways. The trees are in the upland area, and they affect the airport approach areas; but the CT DEEP will have authority on the permit. Mr. Finger said he submitted comments, and notified the Water Department.

Please call James Finger, Wetlands Agent at 860-465-3045 For more information.

Susan Johnson, Chair
